It is our policy to follow NHS guidance and issue a maximum of 3 months supply of medication (dependent on circumstances and consultation with a clinician) if you are going to be away from the Practice Boundary. In most circumstances this would be for holidays etc. If you are away from the boundary for more than 3 months you will be de-registered from the Practice, we will be happy to re-register you when you return to the boundary. Clinicians follow the best practice guidance to issue medication after being able to do a relevant assessment for the patient concerned. Please see the attached link for further information.
